

Stone Age to Iron Age Knowledge Organiser

Key knowledge

- ✓ Stone Age When the first humans began to live in Europe. They used stones as tools.
- ✓ Bronze Age In this era, metals were used to make hunting tools. Humans also began to farm land.
- ✓ Iron Age Humans now used iron to make tools, and farmed land instead of hunting. They lived in communities.
- ✓ Skara Brae is an archaeological site in Orkney, Scotland. It is a Stone Age village. There are 8 houses made of stone. There is only one room in each house. It is famous because it has been well preserved and has taught us a lot about life in the Stone Age.
- ✓ Stonehenge is a famous prehistoric monument in southern England, built at the end of the Stone Age and into the Bronze Age. Originally, it was just an earthwork and up to 150 people were buried there. The huge stones that we see were added in different stages. Some were brought from 240 miles away in Wales.
- ✓ People in the Bronze Age and Iron Age lived in roundhouses. These could be very large and would have housed many people. One household might have had two houses, one for living and one for cooking and making things. In the Iron Age, these houses were sometimes rectangular and were often gathered in farming communities on hills. These were known as hillforts.

BIG Questions

What do we mean by the terms BC and AD?

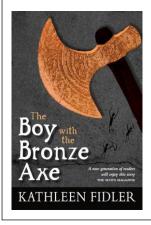

How did the lives of ancient Britons change from the Stone Age to the Iron Age?

What clues help archaeologists reconstruct how people might have lived from the Stone Age to the Iron Age?

What do we mean by settlements and settling?

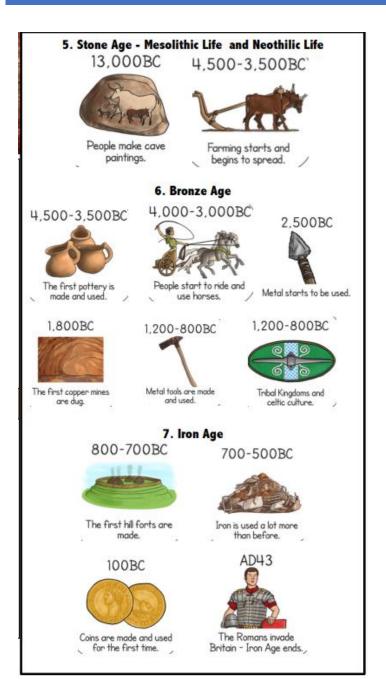

Why did life in Iron Age Britain change so suddenly in 43AD?

Our text
